

CERAMIC FUEL CELLS LIMITED

Creating the energy to succeed™

Announcement

16 February 2005

Energy Developer Welcomes Kyoto

CFCL welcomes the introduction of the Kyoto Protocol. CFCL congratulates those who worked to create a system that will prompt countries and industries to reduce greenhouse gas emissions and improve energy efficiency.

CFCL has also long supported the development of emissions trading, and welcomes its operations.

As a result of the Kyoto Protocol, energy utilities, manufacturers and governments in signatory countries are investing in cleaner energy generation. This is excellent news for companies around the world, such as CFCL, who are developing efficient and clean energy generation systems.

“The Kyoto Protocol effectively firms up our market and boosts interest in our capacity and products” said David Peck, Business Development Manager. “We established our wholly-owned European subsidiary, CFC (Europe) Ltd in August 2004 to directly negotiate agreements and partnerships with utilities and manufacturers in European Kyoto-signatory countries.”

CFCL anticipates its market entry product, a micro-CHP (combined heat and power) unit, currently being manufactured for field trials later this year, will meet demand for highly efficient and cleaner energy production.

ENDS

Ceramic Fuel Cells Ltd (CFCL) is a publicly listed company (ASX code CFU) and world leader in development of energy fuel cells using natural gas. CFCL's fuel cells have potential to meet significant market demand in Europe, UK and Asia for clean, efficient, green and reliable electricity for use on site and sale back into the power grid.

With 100 skilled staff and 28 patents for its unique product design and intellectual property, CFCL is pursuing partnerships for manufacture, production and use of its fuel cells in delivering electricity in homes, offices and industry around the world.
