*Clean power for your home*

## **Ceramic Fuel Cells Limited**

### **Wins Environmental & Sustainable Technology Award 2007**

**25 September 2007** - Ceramic Fuel Cells Limited ("CFCL"), a leading developer of solid oxide fuel cells (SOFC) for micro-combined heat and power units (m-CHP), today announces that it has won the Industry Innovation Design award at the EAST (Environmental and Sustainable Technology) 2007 Awards.

The Industry Innovation Design award was presented to CFCL for its technological advances in developing SOFC products for m-CHP units, which provide clean power and heat for homes and small businesses. The units will provide significant environmental benefits including increased energy efficiency and reduced greenhouse gas emissions.

Open to both private and public sector organisations, the EAST awards provide the opportunity for environmental leaders worldwide to show how their organisations are moving forward with viable environmental and sustainable technology solutions. A number of blue-chip companies were nominated for these awards, including Citroen UK Ltd, BT Group Plc, BMW Group UK and Tesco Stores Limited.

The judging panel for the event included Don Ridley MChemE FRSA, Environment Agency, David Bizley, RAC Plc and Dr Mike Hugh PhD, Fuel Cell Today.

The 2007 EAST Gala Awards were held last Friday 21<sup>st</sup> September at the House of Lords.

Commenting on the award, Brendan Dow, Managing Director of Ceramic Fuel Cells said:

*"We are delighted to have been honoured with EAST's Industry Innovation Award, which recognises CFCL's innovative design of Gennex, our fuel cell module and reinforces our leading role in the sector. We believe that CFCL's technology is the most advanced offering in the market, and that these fuel cells could make a significant difference to our customers' carbon footprint."*

## NOTES TO EDITORS

### About CFCL

Ceramic Fuel Cells Limited is a leader in developing solid oxide fuel cell (SOFC) technology which can provide reliable, energy efficient, high-quality, and low-emission electricity from widely available natural gas and renewable fuels. CFCL is developing SOFC products for small-scale on-site micro combined heat and power (m-CHP) and distributed generation units that co-generate electricity and heat for domestic use. CFCL is listed on the London Stock Exchange AIM market and the Australian Stock Exchange (code CFU).
