

CERAMIC FUEL CELLS LIMITED

Clean power for your home

29 July 2009

Ceramic Fuel Cells moves ahead with development of combined heat and power units for French market

Ceramic Fuel Cells Limited (ASX/AIM: CFU), a global leader in fuel cell development, has extended its agreement with GDF SUEZ to develop and deploy fuel cell micro combined heat and power (mCHP) units in France.

Ceramic Fuel Cells' heat and power units convert natural gas to electricity and heat, providing power and heating for homes and other buildings.

Ceramic Fuel Cells and De Dietrich Remeha are developing a fully integrated mCHP unit which will produce up to 2kW of electric power and provide hot water for use in French households. The mCHP unit comprises a fuel cell module from Ceramic Fuel Cells together with a condensing boiler from the De Dietrich Remeha Group.

Ceramic Fuel Cells and De Dietrich Remeha expect to deliver the first fully integrated unit to GDF SUEZ in late November 2009.

This agreement to move to the next stage of product development follows the successful completion of the first phase of the partners' product development. In this phase a semi-integrated prototype unit was developed in order to meet performance requirements for the French market.

The company's heat and power units have achieved electrical efficiencies of 60 per cent while exporting power to the grid. This electrical efficiency is far higher than any other micro combined heat and power technology.

Ceramic Fuel Cells is also developing products with leading utility and appliance partners in Germany, the United Kingdom and Japan.

About Ceramic Fuel Cells Limited

Ceramic Fuel Cells Limited is a world leader in developing solid oxide fuel cell technology to provide highly efficient and low-emission electricity from widely available natural gas. The company is developing micro combined heat and power and distributed generation units that generate electricity and heat for homes and other buildings. Ceramic Fuel Cells is developing products with leading appliance partners and utility customers in Germany, France, the United Kingdom and Japan. In May 2009 the company launched its BlueGen gas-to-electricity product. Headquartered in Melbourne, and with operations in the UK and Germany, Ceramic Fuel Cells is listed on the London Stock Exchange AIM market and the Australian Securities Exchange (code CFU).

About GDF SUEZ

One of the leading energy providers in the world, GDF SUEZ is active across the entire energy value chain, in electricity and natural gas, upstream to downstream. It develops its businesses (energy, energy services and environment) around a responsible-growth model to take up the great challenges: responding to energy needs, ensuring the security of supply, fighting against climate change and maximizing the use of resources. GDF SUEZ relies on diversified supply sources as well as flexible and high-performance power generation in order to provide innovative energy solutions to individuals, cities and businesses. The Group employs 200,000 people worldwide and achieved revenues of €83.1 billion in 2008. GDF SUEZ is listed on the Brussels, Luxembourg and Paris stock exchanges and is represented in the main international indices: CAC 40, BEL 20, DJ Stoxx 50, DJ Euro Stoxx 50, Euronext 100, FTSE Eurotop 100, MSCI Europe and ASPI Eurozone.
